AND COLLPRIMVASC

The third edition of the "Endograft" meeting (ENDOvascular Global Roman Arterial Featured Therapies) will place at the center of its educational activity the updating and active comparison between the players of Italian and international vascular surgery on all the innovations and the most interesting future prospects of arterial endovascular surgery.

This area of interest has the peculiarity of enjoying continuous currents of innovation, both in terms of "devices" and, above all, in terms of approach and use of these products, so much so that it is not uncommon for industries to adapt the "Instructions For Use" of their materials based on the evidence presented by the international scientific community. As in the second edition, a fundamental part of "Endograft" will include Recorded Live Cases presented by whom we believe to be the key opinion leaders in this field.

Presentation and sharing of "real world" experiences.

Indeed, this is the format that generates the most productive discussions and that really does provide something important to its participants, a "plus" to take home after attending.

Corsie Sistine

The Hospital of the Holy Spirit (Italian: L'Ospedale di Santo Spirito in Sassia), considered one of the oldest hospitals in Europe, was built to assist the poor, the sick and abandoned infants, as testified by the Safe Haven Baby Box outside the building. Pope Innocent III (1198-1216) entrusted the Templar knight Guy of Montpellier, founder of the Hospitaller Order of the Holy Spirit, to manage the hospital, and the architect Marchionne d'Arezzo to build it.

The hospital, which later took the name of Corsia Sistina (Italian for "Sixtine Aisle"), was embellished with a cycle of frescoes, commissioned by the pope himself, with the aim of narrating the moments of his life and the history of the ancient Innocentian building. The sistine lane, surmounted by a lantern, houses an altar attributed to Andrea Palladio and a pictorial work by Carlo Maratti. The marble portal known as "of Paradise". In the second half of the 1900s the Corsia Sistina was divided into two sections, named respectively "Sala Lancisi" and "Sala Baglivi", in memory of the illustrious doctors Giovanni Maria Lancisi (1654-1720) and Giorgio Baglivi (1668-1707). Pius V (1566 - 1572) expanded the hospital with the construction of the Palazzo del Commendatore (Italian for "Palace of the Knight Commander"), by architect Giovanni Lippi (aka Nanni di Baccio Bigio) and managed by Monsignor Bernardino Cirillo. The Palace, built around an elegant quadrangular courtyard, is adorned with a fountain donated by Alexander VII (1655-1667) and a 19th-century six-hour clock commissioned by Commander Ludovico Gazzoli. The building houses the ancient Spezieria (pharmacy), the place where pharmaceutical research was conducted, medicinal herbs were ground, as nowadays testified by the collections of ancient vases and mortars.

On the main floor, the Commander's lounge overlooks the elegant loggia (balcony), magnificently decorated with frescoes, narrating the history of the ancient hospital.

Under the pontificate of Clement XI (1700-1721) the Lancisiana Library was founded by Giovanni Maria Lancisi, papal doctor and officer, for the benefit of young medical residents of the Holy Spirit Hospital. In 2003 the Lancisiana Library suffered serious structural damage, as a consequence to the damage to the Corsie Sistine; therefore, it became necessary to transfer the entire bibliographic heritage to a temporary deposit, pending restorations.

With Alexander VII (1655-1667) the hospital complex of Santo Spirito developed further, with the building of the Alessandrina hospital hall, today used as the seat of the Museum of the History of Healthcare Art. With Benedict XIV (1724-1730) it was further expanded with the construction of a third arm called "Corsia Benedictine". At the beginning of the 20th century the ancient Benedictine Lane was demolished, in favor of the arrangement of the Vittorio Bridge and the walls of the Tiber. The eastern elevation was rebuilt on the model of the ancient Sistine hospital and on the side of the Lungotevere in Sassia other buildings were added, home to the modern wards of the current Santo Spirito Hospital.

Jubilee of the Endovascular Era

Scientific Program

SESSION 1

Regenerative medicine in lower limb vascular diseases

SIMCRI Lazio Joint Session

Moderators: M. Danese, A. Ascoli Marchetti

- 9.00** Skin micrografts in 'difficult' trophic lesions
M. Danese
- 9.08** Pain control with mononuclear cells in non-revascularized arterial disease
A. Ascoli Marchetti
- 9.16** The diabetic foot and regenerative therapy from adipose tissue
P. Notari
- 9.24** Current role of ozone therapy in the treatment of leg ulcers
G. Sanchez

Discussion

SESSION 2

New in Phlebology

Moderators: C. Riccioni, S. Venosi

- 10.00** Ablative variceal surgery versus conservative haemodynamic surgery
S. Petrangeli
- 10.08** Scleromousse in varicose veins of the lower limbs
M. Gallucci
- 10.16** Non-thermal ablation in superficial venous insufficiency
C. Chaves
- 10.24** Endovascular treatment of DVT and prevention of post-thrombotic syndrome
P. Rabuffi
- 10.32** Endovascular treatment of venous occlusion: from May-Thurner syndrome to inferior vena cava hypoplasia
J. Van den Berg

10.40 New possibilities for outpatient treatment of varicose vein disease
C. Cavazzini

Discussion

SESSION 3

Vascular access for hemodialysis, creation, maintenance and rescue

Moderators: R. Chiappa, A. Scolaro

11.08 Endo AVF creation
R. Palumbo

11.16 Endo AVF sustainability
P. Tabbi

11.24 Stentgraft
L. Harduin

11.32 Central venous system recanalization
R. Cancellieri

11.40 Acute thrombosis
M. Millarelli

11.48 Hybrid devices
S. Dominijanni

Discussion

12. **FINAL REMARKS**
N. Mangialardi

CME EVENT

Event ID: **416870**

ID provider: **4596**

CME Credits: **2,8**

Event accredited for: Angiology, Cardiology, Cardiac surgery, General surgery, Thoracic surgery, Vascular surgery, Nephrology and Radiodiagnostics

At the end of the event, learning will be assessed through an online test.

The minimum score required to pass the test is 75%.

To take the test you must have attended at least 90% of the total number of hours indicated in the program.

Evaluation procedures

Multiple choice online questionnaire to be completed on the platform within 72 hours of the event end date:

<https://trainingecm.womblab.com/event/264/showCard>

Badges

Each participant will receive, upon registration, a badge that will allow them to access the conference rooms, to be shown to the personnel in charge for CME accreditation purposes.

Certificate of attendance

In order to receive your certificate of attendance, please log in at:

<https://trainingecm.womblab.com/>.
